The Cloud will transform your business

TRANSFORMING YOUR BUSINESS WITH CLOUD

As your organization begins to transition to the cloud, you will quickly identify that there are limited resources in the industry with the right skills, experience and vision to support your organizational objectives. Part of your transition will include hiring of new talent to help lead your organization and execute quickly. There will be areas where your organization will not have the need to hire direct staff for specific cloud objectives but instead you will be looking for expert cloud consultants to come in and fill those resource needs. Appko clearly understands this reality and has designed our services around this key need in the industry. Appko's professional services team can help at any point within your cloud lifecycle transition.

flexible solution development for your cloud needs

CLOUD IMPLEMENTATION SERVICES

Appko's team will work with your team to ensure your cloud implementation is successful. Whether you are deploying Cisco's Intelligent Automation for Cloud (CIAC) or you are simply defining your cloud approach, Appko can engage with you to ensure you have the right skills, the right approach at the right time.

- Cisco CIAC 3.1 Enterprise Edition
- Cisco CIAC 3.0 Starter Edition
- Cisco CIAC 2.0
- Cisco Cloud Portal Development
- Cisco Process Orchestrator Workflow
- Cloupia Unified Infrastructure Controller
- Appko MyCloudPod (MCP)
 - Self-Service for Cloud

CLOUD CUSTOMIZATIONS AND INTEGRATIONS

Appko has a long history with implementing, customizing and integrating systems with enterprise applications such as SAP, Oracle, PeopleSoft, etc. Cisco's CIAC is no different than these enterprise applications. CIAC can be integrated with almost any third party software or solution. Appko's team has integrated several major systems with CIAC such as: HPOO, Remedy, HPSA, VMware, Active Directory, and Nimsoft

APPKO CONSULTING PROVIDES COMPLETE END TO END SOLUTION DEVELOPMENT

CLOUD MANAGEMENT HOSTING

Appko's cloud management hosting service is based on Cisco's Flexpod solution along with Appko's AppFirewall technology. Appko developed this solution to host

- development environments
- testing environments
- sales/demo environments
- production environments

virtual environments of CIAC for our consultants, developers and sales professionals. Appko's data center is SAS70 certified in downtown San Jose, CA. Appko's cloud is ideal for customers who are just starting with their CIAC discovery and want to minimize the time to deploy the software stack Appko has a migration service offering for those companies looking for a migration path once they have developed CIAC to their needs

Cisco CIAC Service Offerings

Appko has the ability to support your organization with complete lifecycle services for Cisco's Intelligent Automation for Cloud (CIAC). Our team has implemented cloud solutions for several Fortune 500 companies and service providers. Whether you are simply trying to stand up CIAC or you are attempting to fully embrace the platform and make your own cloud with a differentiated offering, Appko is here to help you succeed

Cloud Management in the Cloud

Appko has its own Cloud solution for managing virtual environments for our developers, consultants and customers. Our data center is SAS70 certified and is in the heart of the Silicon Valley. Appko has created its own virtual firewall technology along with our Flexpod so that we can offer complete CIAC Hosting for customers who prefer the off premises approach.
