Appko Services (Cisco IAC)

CLOUD ADOPTION

Your cloud must have self-service to be considered a true cloud solution. Self-service by definition suggests a very intuitive User Experience. With every project, Appko ensures that the User Experience is developed for a high adoption rate with little to no training required. This essential component of the Appko delivery will ensure that your cloud implementation is done with a high adoption rate for the highest success.

CUSTOMIZATIONS

No matter how large or small your cloud implementation is, there will more than likely be unique requirements that your cloud must meet. For these requirements, Appko can customize Cisco IAC to your needs

APPKO Services

As your company embarks in the journey to the cloud trusted industry experts and advisors provide an edge you pave the path to success. Cisco IAC Integrations

Appko has a wealth of experience successfully integrated Cisco IAC with most cloud software and data center applications. Below is a summary of the more common integrations our team has completed.

Application	Integration Summary
LDAP/ Active Directory	Leverage the corporations existing directory system and Role Based Access Control for the Cloud IaaS
HPOO	Organizations with HPOO can integrate to sustain the investment and take advantage of the Cloud capabilities with Cisco IAC
HP SA	Organizations with HP SA can integrate to sustain the investment and take advantage of the Cloud capabilities with Cisco IAC
HPNA	Organizations with HP NA can integrate to sustain the investment and take advantage of the Cloud capabilities with Cisco IAC
OpenStack	Take advantage of the vast open-source based Cloud capabilities and implement your Cisco IAC with OpenStack
vCloud Director (VCD)	Organizations with vCloud Director can integrate to sustain the investment and take advantage of the Cloud capabilities with Cisco IAC
Amazon (EC2)	Integrating with Amazon EC2 allows your Cloud to become a true hybrid (Public and Private) offering for your organization
Nimsoft Monitoring	Top tier Cloud providers offer monitoring of the cloud resources. Cisco IAC and Nimsoft allow you to offer the same SLA monitoring and assurance.
Cognos (BI)	Cognos Business Intelligence can be customized for your organizations needs. Examples: Show back and Charge back to the organization.
API Library for CCP	Appko's API Library for Cisco Cloud Portal can be useful for server custom based design cloud projects
rPath (PaaS)	For organizations needing the capabilities of a Platform as a Service offering, rPath and Cisco IAC provide the essential building blocks.
Puppet	Integrating Cisco IAC and Puppet will ensure your existing processes for server build are leveraged with your cloud capabilities.
Cobbler	Cobbler can be integrated with Cisco IAC and can centralize your configurations of the vm's within your cloud solution.
Xen Hypervisor	Cisco IAC not only works with VMware but also open source Xen. This integration allows you to take advantage of Xen without your cloud.
KVM	Organizations already invested into leveraging Kernal based VM's can integrate Cisco IAC into KVM.
Virtual Firewalls	Integrating Cisco IAC with Virtual Firewalls enables you to build a true virtual cloud.
Zenoss	Zenoss is an open-source based BI solution which when integrated into Cisco IAC offers a wealth of use case possibilities such as: show back and charge back.
Ticketing Systems	Integrating your Cisco IAC with your existing ticketing system (Remedy, Bugzilla, etc) will allow you to maintain control of your ITIL solution while offering new cloud services.
F5 Load Balancers	Add Load balance capabilities to your cloud solution with Cisco IAC and F5 Load Balancer integration.
Cisco ASA	Integrating Cisco IAC with Cisco ASA allows you to maintain the firewall and security aspects of your existing infrastructure and offer those same capabilities via the cloud
